### PLUS AND AUTOMATIC MODELS AUTOMATIC REFILLING

A HIGH-PRESSURE PUMP INJECTS WATER DIRECTLY INTO THE BOILER, KEEPING ITS LEVEL ALWAYS CONSTANT WHILE USING THE STEAM.

### EASY PLUS AND EASY MODELS MANUAL REFILL - ADVANCED VERSION

WHEN THE WATER IN THE BOILER HAS FINISHED, THANKS TO A NEW SOFTWARE IT IS POSSIBLE TO COMPLETELY AND DIRECTLY REMOVE THE RESIDUAL PRESSURE IN ORDER TO OPEN THE CAP WITH NO RISK OF STEAM ESCAPING.

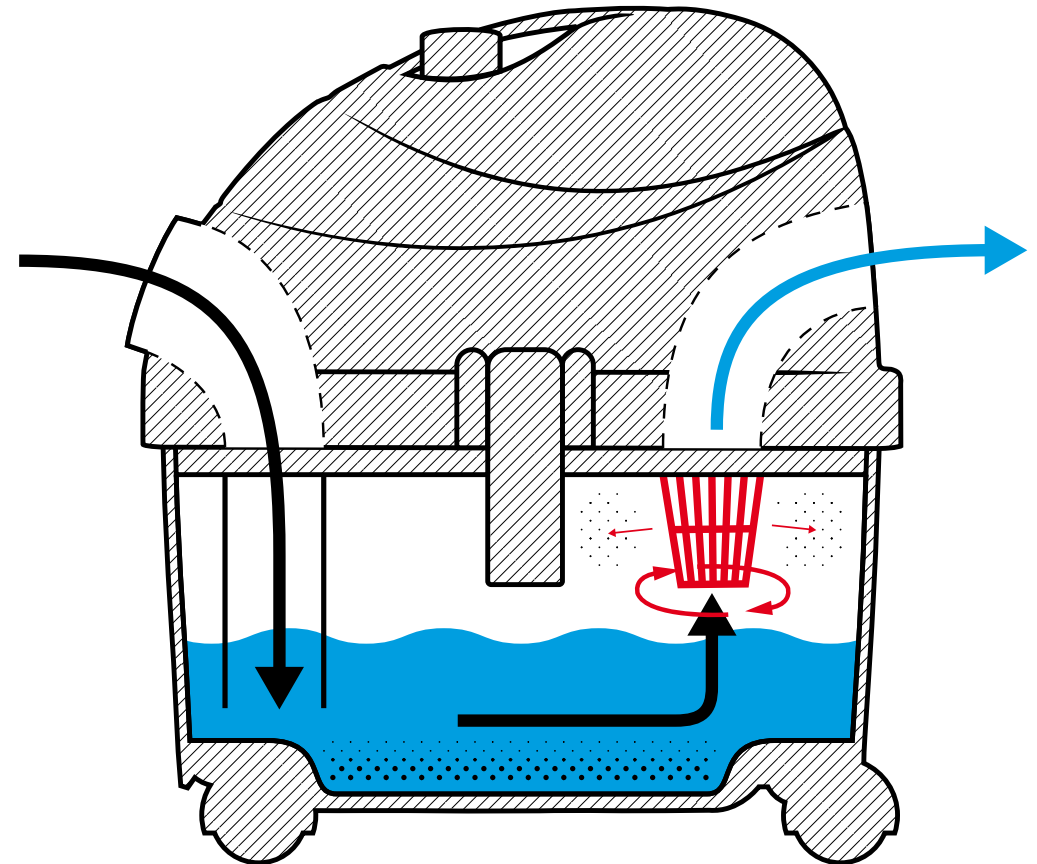

### AIR CLEANING CYCLE

BAD AIR IS SUCKED AND FILTERED THROUGH THE WATER.

THE EXCLUSIVE MOLECULAR SEPARATOR CATCHES AND REJECTS EVEN THE SMALLEST PARTICLES

THE OUTCOMING AIR IS HEALTHY, CLEAN AND IT SMELLS GOOD.
